

Studying under Lilianna Dutka has given me an advantage in the world of clinical aesthetics. Under her watchful guidance and never ending encouragement and support, I gained the knowledge and confidence that enabled me to “step out on my own”. Lilianna has walked through each step of the way with me throughout this journey. From the very first telephone conversation with her, it has been a constant and consistent learning experience.

Her background in naturopathic medicine only gives more credence to her credibility as an educator. Lilianna is passionate about her work and loves to share her knowledge. I am always kept up to date on new products and equipment. You can sense the excitement in her voice when she has something new to share. I find myself bursting with anticipation while waiting for her to pass on her new found knowledge. If there is any doubt regarding a decision that I have to make with regard to any treatment, Lilianna is only a phone call away to add her expertise.

She has guided me through decisions regarding skin care, body treatments, products and equipment. Using Maystar and MBE Products & Equipment (Oxy Megastation and Synergica) has been exciting and challenging thanks to Lilianna. I am never bored. The options for face and body are endless. In my search for an educator, I found a friend and mentor in Lilianna.

Yours sincerely,

Michelle Grant
