

Testimonial - ThermaSkin

“A Younger Sister”

I usually do not write testimonials, but in this case I am happy to make an exception.

When I used to go clothes shopping with my teenage daughter, sales people would respond to our entrance as expected -- steering her in the direction of “younger clothing” sections... Myself, well you know...

I had heard a lot about RF...and the possible pain...the so-so results....After some Thermage® sessions I was not happy...not happy with the results, the expense, with the pain pills given to me, the nausea. I was frustrated...I was not a happy puppy and somewhat jaded...

Dr. Norkus explained to me this new **ThermaSkin** technology, no pain & visible results immediately! I could do the sessions over lunch, with no downtime...I came to look forward to the treatments...I could see the changes...and dramatic ones after 5 treatments.

After several sessions with **ThermaSkin's Radio Frequency**, I was given an amazing pre-Christmas present -- When about to enter a fitting room stall a sales person remarked, “Your sister is in the change room...please wait.”

After my **ThermaSkin** sessions, my daughter was now my younger sister...I shall take *that* mistake any day...With the pollution & stress-compounded changes in my skin, I was not looking forward to the scalpel...But now my skin tone, the look, feel and texture had really improved so much in such a short time...and without surgery!!!

At 44, with a 17 year old daughter, going out shopping together has become an unexpected pleasure...not just for the bonding and the finds on Queen St. West, but for the unintended complements and feeling like an older sister.

A big Thank You to **ThermaSkin...**
