

SkinNutritionals

Targeted Nutritional Supplements

Following much clinical and homeopathic research and testing, *Formula Life*, has introduced SkinNutritionals from Pharma-Aesthetics as the latest addition to our Meso-Aesthetic holistic skin care program.

SkinNutritionals addresses many common skin conditions more thoroughly and directly. Mineral deficiencies and imbalances are reflected in the face as various skin conditions, including pigmentation, acne, wrinkles, dryness, exzema, facial form changes and others. The greater the deficiency, the greater the changes in the face.

Some conditions cannot be effectively attended to solely by topical treatments. Cell salt supplements have been proven to help balance mineral deficiencies thus correcting the related skin conditions.

How To Read the Face: As a tool for diagnosis, check skin colour, condition of eye brows, size and colour of lips, blemishes, musculature, undereye circles and more. Signs of mineral imbalance include blue lips, brownish-black circles under the eyes, white skin flakes, and traslucent tips of teeth.

There are 12 different types of cell salts. They are non-toxic, inorganic biochemicals found in the blood and tissues which help catalyze essential cell processes.

Formula ANTI-AGEING:
Wrinkles Brown Spots
Dark Circles Puffy Eyes
Hair & Nails
Facial Swelling

Formula DETOX:
Constipation
Acne & Oily Skin

Take 5 pellets twice a day, morning and evening, letting them dissolve on the tongue.

The biochemical tissue salt tablets are prepared using methods based on *Dr. W. H. Schussler's Biochemical System of Medicine* (introduced in 1871), in accordance with the German Homeopathic Pharmacopia.
